

# Molecular and Cellular Biochemistry:

An International Journal for Chemical Biology in Health and Disease

CONTENTS VOLUME 263, Nos. 1 & 2, August 2004

ADVANCES IN CARDIOVASCULAR RESEARCH

Dr. Junor A. Barnes

|  |         |
|--|---------|
| Editorial  | 1       |
| Junor A. Barnes: Preface   | 3       |
| Walter J. Koch: Genetic and phenotypic targeting of $\beta$ -adrenergic signaling in heart failure   | 5-9     |
| Rajat Sethi, Qiming Shao, Bin Ren, Harjot K. Saini, Nobuakira Takeda and Naranjan S. Dhalla: Changes in $\beta$ -adrenoceptors in heart failure due to myocardial infarction are attenuated by blockade of renin-angiotensin system  | 11-20   |
| Chris R. Triggle, Hong Ding, Todd J. Anderson and Malarvannan Pannirselvam: The endothelium in health and disease: A discussion of the contribution of non-nitric oxide endothelium-derived vasoactive mediators to vascular homeostasis in normal vessels and in type II diabetes | 21-27   |
| Dalip Ragoobirsingh, Donovan McGrowder, Tara Dasgupta and Paul Brown: The effect of nitric oxide on glucose metabolism   | 29-34   |
| Péter Andr  ka, Thanh Tran, Keith A. Webster and Nanette H. Bishopric: Nitric oxide and promotion of cardiac myocyte apoptosis   | 35-53   |
| Ana Maria Cuervo: Autophagy: Many paths to the same end  | 55-72   |
| Bradley M. Palmer, Bradley K. McConnell, Guo Hua Li, Christine E. Seidman, J.G. Seidman, Thomas C. Irving, Norman R. Alpert and David W. Maughan: Reduced cross-bridge dependent stiffness of skinned myocardium from mice lacking cardiac myosin binding protein-C                | 73-80   |
| Martin E. Cullen, Kimberley A. Dellow and Paul J.R. Barton: Structure and regulation of human troponin genes   | 81-90   |
| Paul J.R. Barton, Leanne E. Felkin, Maren U. Koban, Martin E. Cullen, Nigel J. Brand and Gurtej K. Dhoot: The slow skeletal muscle troponin T gene is expressed in developing and diseased human heart   | 91-97   |
| Aldrin V. Gomes and James D. Potter: Cellular and molecular aspects of familial hypertrophic cardiomyopathy caused by mutations in the cardiac troponin I gene   | 99-114  |
| Aldrin V. Gomes, Junor A. Barnes, Keita Harada and James D. Potter: Role of troponin T in disease  | 115-129 |
| A. Mattiazzi, C. Mundi  a-Weilenmann, L. Vittone and M. Said: Phosphorylation of phospholamban in ischemia-reperfusion injury: Functional role of Thr <sup>17</sup> residue  | 131-136 |
| Marek Michalak, Lei Guo, Murray Robertson, Mira Lozak and Michal Opas: Calreticulin in the heart   | 137-142 |
| Sahika Guner, Ebru Arioglu, Aydin Tay, Atalay Tasdelen, Sait Aslamaci, Keshore R. Bidasee and U. Deniz Dincer: Diabetes decreases mRNA levels of calcium-release channels in human atrial appendage  | 143-150 |
| Satyajeet S. Rathi, Harjot K. Saini, Yan-Jun Xu and Naranjan S. Dhalla: Mechanisms of low Na <sup>+</sup> -induced increase in intracellular calcium in KCl-depolarized rat cardiomyocytes   | 151-162 |
| Susan Wray and R.D. Smith: Mechanisms of action of pH-induced effects on vascular smooth muscle  | 163-172 |
| Peter K. Law, Kh. Haider, G. Fang, S. Jiang, F. Chua, Y.T. Lim and E. Sim: Human VEGF <sub>165</sub> -myoblasts produce concomitant angiogenesis/myogenesis in the regenerative heart  | 173-178 |
| Bodh I. Jugdutt and Grzegorz Sawicki: AT <sub>1</sub> receptor blockade alters metabolic, functional and structural proteins after reperfused myocardial infarction: Detection using proteomics  | 179-188 |
| Steve Ian Smith: PPAR- $\gamma$ receptor agonists—a review of their role in diabetic management in Trinidad and Tobago   | 189-210 |
| R.S. Faustino, T.A. Clark, S. Sobrattee, M.P. Czubyrl and G.N. Pierce: Differential antioxidant properties of red wine in water soluble and lipid soluble peroxyl radical generating systems   | 211-215 |
| Darren J. Holub and Bruce J. Holub: Omega-3 fatty acids from fish oils and cardiovascular disease  | 217-225 |
| Junor A. Barnes, Shamjeet Singh and Aldrin V. Gomes: Protease activated receptors in cardiovascular function and disease   | 227-239 |
| Raja B. Singh, Sucheta P. Dandekar, Vijayan Elimban, Suresh K. Gupta and Naranjan S. Dhalla: Role of proteases in the pathophysiology of cardiac disease   | 241-256 |
| Index to Volume 263  | 257-259 |
| Instructions for Authors   | 261     |
